For Lecture and Case Presentation

Topic: "Role of the Primary Care Provider"

Thursday, December 17, 2015

8:00 a.m. EST

(via videoconference or phone)

What is Project ECHO?

Project ECHO (*Extension for Community Healthcare Outcomes*) is a healthcare program developed to treat chronic and complex diseases.

This is accomplished by creating an efficient and effective way for local healthcare providers to communicate with experts to receive guidance and treatment strategy for specialty diseases.

At Maimonides Medical Center, our focus is on:

Children and Youth with Epilepsy

Who can participate?

- Physicians
- Registered Nurses
- Nurse Practitioners
- Physician Assistants
- Pharmacists
- Non-licensed health care providers
